DETAILED ACTION

Allowable Subject Matter

Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a securely transferring data. Each independent claim identifies the uniquely distinct features of "the user encrypts the first data using a first encryption key associated with the first party, and then encrypts the second data using, as encryption parameters, both public data of said first party and third data comprising the encrypted first data; the third data is provided to the first party and the encrypted second data is provided to the second party; the first party uses a first decryption key to decrypt the encrypted first data, as provided to the first party in said third data, whereby to recover the first data; the first party also using the third data, along with private data related to said public data, to generate a second decryption key; the second decryption key is provided to the second party which uses it to decrypt the encrypted second data".

The closest prior art, Cocks (US 20040240666), discloses a conventional system for securely transferring data using identifier-based encryption fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
